

Hash Trash – Run 1829 – 26 June 2023

17 runners/walkers (plus one late blow in) arrived at the abode of Flaps Up and JFI full of anticipation. Their hopes were further raised when they spotted Flaps stoking a well alight fire bucket. This night could not get any better. Bronco was slightly disappointed as he couldn't find where Flaps had hidden the reserve stocks of firewood. In fact, he went through the entire evening without putting one piece of wood on the fire. A new record.

After completing the well-set run, everybody tucked into nibbles followed by the main course of pea and ham soup and chicken casserole.

The circle was called, and the proceedings were as follows:

Shit of the Week (SOW)

Went to Flaps Up (again). Still can't keep his mouth shut and was sprung trying to bribe the RA into giving him a good score for the run.

Run Report

The RA (as the only person other than Flaps) to do the whole run was well on the way to giving Flaps a top score but felt that although the run was worthy of this, and the nosh was excellent, due to Flaps being unable to keep his mouth shut and the previously mentioned attempt at graft and corruption could only bring himself to score the run at a 5. At least it was a positive score.
